EDUCATION

Laurentian University, Sudbury, Ontario—*M.Sc. in Computational Science*

September 2024–April 2026

BRAC University, Dhaka, Bangladesh—*B.Sc. in Computer Science & Engineering*

January 2013–August 2017

EXPERIENCE

WebAlive, Melbourne, Australia—*Senior Software Engineer (Remote)*

June 2023–June 2024

- Worked on web applications from planning to delivery, helping shape the overall architecture and technical approach.
- Built and improved features using PHP, Python, JavaScript, React, and Vue, depending on project needs.
- Collaborated with designers, developers, and stakeholders to turn business requirements into working solutions.
- Helped maintain code quality through clean development practices, reviews, and practical technical decisions.
- Participated in hiring and team management, including evaluating candidates and supporting onboarding and collaboration workflows.

Bit Mascot (Pvt) Ltd, Dhaka, Bangladesh—*Software Engineer*

June 2021–May 2023

- Developed and enhanced software systems with a focus on clean architecture, maintainability, and performance.
- Built custom modules, application features, and integrations for web-based platforms.
- Participated in technical planning, debugging, testing, and deployment

SKILLS

Languages: PHP, Python, JavaScript, SQL

Frameworks: Laravel, Django, Django REST Framework, FastAPI, React, React Native, Vue.js, Node.js, Next.js, Nuxt.js

Cloud & Platforms: AWS (S3, Rekognition, EC2), Google Cloud, WordPress, Shopify

Frontend & UI Tools: React, Vue.js, jQuery, Three.js, Chart.js, Konva.js

APIs & Backend: REST APIs, OAuth2, OpenAPI/Swagger, Middleware, Third-party API Integration

Development Tools: Git, Agile/Scrum, Technical Documentation, System Design, Debugging, Testing

Certifications

Artificial Intelligence for Cybersecurity

Training

Agile hands-on with Scrum practiced – BITM

support across multiple projects.

- Debugging, testing, and technical support for different products.
- Contributed to team delivery by breaking down tasks, solving technical issues, and improving development workflows.

CodeRex, Dhaka, Bangladesh—Junior Software Engineer

October 2017 - May 2021

- Developed custom WordPress plugins, themes, and web features for a range of client projects.
- Worked on Shopify solutions, including custom features and support for e-commerce functionality.
- Built integrations with cloud storage and other third-party services.
- Maintained, customized, and enhanced existing products based on client needs and project requirements.

AWARDS

Special Recognition as
Software Engineer – Bit
Mascot (Pvt) Ltd

LANGUAGES

English – Fluent

PROJECTS

- **Seat Plan Builder for Event Booking App:** Developed an interactive seat planning and booking interface application for web and mobile.
Tech: React, React Native, Redux, Konva.js
- **Voice Clone App:** Developed the frontend and backend of an AI-powered voice cloning application.
Tech: Python, FastAPI, React, React Native (mobile app), PyTorch
- **AWS Rekognition Face Detection:** Built a real-time face detection system for live event attendee identification.
Tech: Python, AWS Rekognition, boto3, OpenCV, NumPy
- **Email Template Builder:** Built a drag-and-drop email template builder with AI-assisted template generation.
Tech: React, Redux, Context API, React Native (mobile app), OpenAI API
- **Traffic Sign Detection:** Built a computer vision system for traffic sign detection and recognition from moving vehicle footage.
Tech: Python, OpenCV, NumPy, Random Forest Classifier, Mean Shift Clustering
- **WordPress Media Storage Plugin:** Developed a WordPress plugin to offload media assets to Amazon S3 and Google Cloud Storage.
Tech: PHP, WordPress CPT, Amazon S3, Google Cloud Storage, OAuth, WP Hooks
- **WordPress VR Experience:** Developed a WordPress-based interactive virtual tour experience for immersive 360-degree viewing.
Tech: PHP, JavaScript, Pannellum, Three.js, WebXR, A-Frame
